Commonwealth of Massachusetts

D.T.E. 01-31 Phase II

Respondent: Paula L. Brown
Title: Vice President - Regulatory

REQUEST: Record Request

DATED: October 23, 2002

ITEM: AG-VZ RR-1 Referring to Verizon's June 5, 2002 Compliance filing; Tab A, Attachment A, a listing of services that are regulated:

Which services have increased since August 15, 2001, and by how much?

REPLY: Since August 15, 2001 there have not been any rate increases associated with the retail services listed on Tab A, Attachment A to Verizon MA's June 5, 2002 compliance filing.

Overall, rates associated with wholesale services have been unchanged or, in the case of unbundled network elements (UNEs), reduced. Certain UNEs have been increased in the time period encompassing this request. These rate increases are the result of 1) establishing a uniform end office switching rate, in which case there is a corresponding decrease to the Peak rate; 2) updating a quarterly rate that reflects Verizon MA's reciprocal compensation expense; or 3) a Department directive. In each case, the Department has approved the rate change. A listing of the elements with rate increases and the amount of the increase is identified below.

Amount of Increase
